

Phillip Wessels

SOLUTIONS ENGINEER · PLATFORM ARCHITECT · AGENTIC SYSTEMS BUILDER
AI × HUMAN FLOURISHING · WELLNESS COACH IN TRAINING

phillip.a.wessels@gmail.com 408-644-6963 pawper.dev github.com/pawper San Francisco, CA

SUMMARY

Platform architect and AI-augmented developer with 12 years building systems at the intersection of web technology, API integration, and business operations. Designed and delivered a full-stack WordPress CMS from the ground up; built REST API endpoints, a TBO API integration layer, and a PowerShell reporting platform serving two departments and cross-functional stakeholders. Now expanding into agentic AI systems and multi-agent orchestration as a core technical discipline. Parallel to the technical track, pursuing professional certification in positive psychology and wellness coaching — engaging the intersection of human agency and agentic systems.

SKILLS

Platform & CMS	WordPress (CPTs, taxonomies, Toolset, Elementor, REST API), PHP
Languages	JavaScript, React, SQL, PowerShell, Python, Node.js
APIs & Integration	REST API design & implementation, TBO API, JSON, Postman
DevOps & Tooling	Git/GitHub, Docker, WSL/Linux, Netlify, Cloudinary, Windows Task Scheduler
AI & Agentic	Claude (Code/Cowork), ChatGPT (Codex), GitHub Copilot, OpenClaw, CLAUDE.md/AGENTS.md, Skills
Operations	Zoho Desk, Excel/VBA, Smartsheet, technical documentation & training
Coaching	PERMA framework for flourishing, VIA Inventory of Strengths, Positive Interventions

EXPERIENCE

Classic Vacations (Expedia Group, acquired by TBO)

Web Producer / Web Platform Architect

Oct 2022 – May 2026

- Architected and implemented a custom WordPress CMS from the ground up — custom post types, taxonomies, relational content models (Toolset), JetMenu megamenu, and Elementor page templates — serving thousands of destination, hotel, and itinerary pages used daily by 6+ editors across Marketing and Solutions
- Built a REST API endpoint delivering destination images to client travel statements: hierarchical lookup with parent fallback, custom image sizing, Toolset custom fields for external location IDs, and a coverage-reporting view coordinated with Marketing for gap resolution
- Engineered a TBO API integration layer on hotel property pages — custom import UI with live JSON store, per-field content-source toggles between internal and third-party data, and a photo gallery — enabling real-time

content switching without developer intervention

- Owned all templated product and taxonomy pages; designed full content architecture for destination, hotel, and itinerary content types site-wide
- Reduced Marketing dependency on developers for content publishing through structured CMS design, enabling self-service page creation for 6+ non-technical editors
- Leveraged AI coding assistance (ChatGPT, Copilot, Claude) as a core development practice; explicitly recognized by management for incorporating AI into workflow

Product Operations Admin — QA & Training

Feb 2019 – Oct 2022

- Designed and deployed a centralized reporting automation platform — consolidating hundreds of individual scheduled tasks into a maintainable PowerShell + SQL + Windows Task Scheduler system generating recurring QA, booking, and operational reports for two teams and cross-departmental stakeholders
- Took over and corrected production-critical SQL queries (originally broken by another team) powering QA and booking-travel reports; documented and maintained the query library
- Built a custom Excel VBA add-in that turned a neglected CSV report (source of recurring financial loss) into a one-click pivot table dashboard, driving consistent adoption
- Engineered PowerShell scripts replacing a multi-step error-prone manual process with a single automated workflow; successfully advocated for the software update required to enable it
- Led team adoption of GitHub for version control, replacing email-based code sharing and manual backups; trained new hires and authored process and workflow documentation

Product Operations Admin · contracted via Volt Workforce Solutions, Oct 2013 – Jul 2014

Oct 2013 – Feb 2019

- Supported product contracting operations through QA review, data entry, copy editing, and Excel-based reporting.

EDUCATION

B.A., Special Major — Interactive Intermedia

2008–2011, 2013

California State University, Fresno

Positive Psychology: Martin E. P. Seligman's Visionary Science

Feb 2026

University of Pennsylvania (Coursera) · Credential ID PTEV8VSOB4IV
